

The 72 cell Power House

LG N_eON[™]2

LG370/375N2W-G4

UP TO 19.1% MODULE EFFICIENCY

THE NeON[™] 2 72 CELL - THE PANEL OF THE FUTURE AVAILABLE TODAY

The new LG NeON[™] 2 72 cell has seen many improvements, from longer warranties and higher efficiency to more busbars. This panel is ideal for commercial systems or solar farms seeking an efficient use of space and a high quality panel with great output efficency.

The new NeON^M 2 with 72 cells adopts the award winning CELLO Technology replacing 3 busbars in each cell with 12 thin wires to enhance power output. This technology sets a new standard for innovation and was recognised with the 2015 Photovoltaic Innovation Award at the Intersolar Industry Event in Germany.

More Power per Square Metre

LG NeON™ 2's 370W are a similar physical size to many conventional 300W 72 cell panels. This means with the LG NeON™ 2 370W you get 23% more electricity per square metre than a 310W panel. So you can install more kW of solar on your roof with the LG NeON™ 2.

Improved High Temperature Performance

Solar panels slowly lose ability to generate power as they get hotter. LG NeON™ 2, has an improved temperature co-efficient to our previous model, which means in high temperatures LG NeON™ 2 panels will deliver higher output.

12 Years Product Warranty (Parts & Labour)

LG has extended the product warranty of the LG NeON^m 2 by an additional 2 years from industry average 10 to 12 years. This includes coverage for labour and transport.

Improved 25 Year Performance Warranty

The initial degradation of cells has been improved from -3% to -2%, in the 1st year and the annual rate of degradation has fallen from -0.7%/year to -0.6%/ year thereafter. This brings an 83.6% warranted output at 25 years, compared to 80% for many standard panels.

ABOUT LG ELECTRONICS

LG Electronics embarked on a solar energy research programme in 1985, using our vast experience in semi-conductors, chemistry and electronics. In 2010, LG Solar successfully released its first Mono X[®] series, and LG Solar modules are now available in 32 countries. In 2013 and 2015 the LG NeON™ range won the acclaimed Intersolar Award in Germany, which demonstrates LG Solar's lead in innovation and commitment to the renewable energy industry. With over 300 lesser known brands panels selling in Australia, LG solar panels offer a peace of mind solution.

KEY FEATURES

Proven Field Performance

LG has been involved in a number of comparison tests of the LG panels against many other brand panels. LG NeON™ models are consistently among the best performing in these tests.

Additional Certification

LG NeON[™] 2 panels have received additional certification including for, Salt Mist Corrosion to maximum severity 6. Ammonia Resistance certification and PID Resistance Tests.

Strict Quality Control Reliable for the Future

The quality control of LG world-class production processes is monitored and improved to Six Sigma quality control standards, which includes 500+ monitoring points to effectively maintain and improve our uncompromising standards.

Multi Anti-reflective Coatings Increase Output

LG is using an anti-reflective coating on the panels glass as well as on the cell surface to ensure more light is absorbed in the panel and not reflected. More absorbed light means more electricity generation.

Installation Time Savings

This NeON[™] 2 - 72 cell panel can reduce installation time for commercial systems, as there are less panels required eg. to install a 3 MW system one would need 8,108 LG370W and 10,000 of a 300W – 72 cell panel. There will also be significant savings in design, transport, labor, rails and cabling.

"CELLO" Technology Increases Power

"CELLO" Multi wire busbar cell technology lowers electrical resistance and increases panel efficiency, giving more power per panel and provides a more uniform look to the panel.

Low LID

The N-type doping of the NeON™ cells results in extremely low Light Induced Degradation (LID) when compared with the standard P-type cells. This means more electricity generation over the life of the panel.

Extensive Testing Programme

LG solar panels are tested between 2 to 4 times the International Standards at our in-house testing laboratories, ensuring a very robust and longer lasting solar module.

Double-Sided Cell Structure

In conventional panels the cells produce energy from the front only. The NeON™ Cell produces energy from both the front as well as the back of the cell. This innovative technology allows the absorption of light from behind the panel which raises the panel's efficiency and electricity output.

Positive Tolerance (0/+3%)

If we sell you a 320 Watt panel then the flash test of this panel will show somewhere between 320W and 329.6W. Some competitor panels have -/+ tolerance, so you could get a flash test result below the rated Watt, meaning you pay for Watts you never get.

Anti PID Technology for Yield Security

PID (Potential Induced Degradation) affects the long term ability of panels to produce high level electricity output. LG panels have anti PID technology and have been successfully tested by leading third party laboratories regarding PID resistance.

Fully Automated Production in South Korea

All LG solar panels are manufactured in a custom designed and fully automated production line by LG in Gumi, South Korea ensuring extremely low tolerances. This means great consistency between panels.

LG N_CON[™]2 - 72 Cell

LG NeON[™] 2 72 cell- INNOVATIVE, CLEVER, HIGH EFFICIENT

LG NeON™ 2 72 cell solar modules now offer even more performance. Featuring LG's 12 wire busbar CELLO Technology for improved performance and reliability, it can also withstand a front load of 5,400 pascals. LG has extended its product warranty from 10 to 12 years and improved its linear performance guarantee to at least 83.6% of nominal output after 25 years.

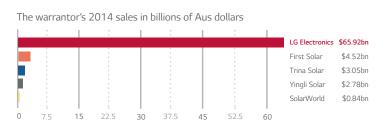

LOCAL WARRANTY, GLOBAL STRENGTH

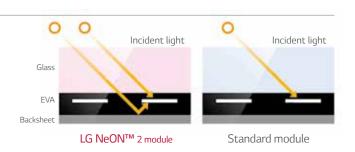

LG Solar is part of LG Electronics Inc., a global and financially strong company, with over 50 years of experience in technology.

Good to know: LG Electronics Australia Pty Ltd is the warrantor in Australia and New Zealand for your solar modules. So LG support is only a local phone call away.

HIGHER OUTPUT, HIGHER YIELD

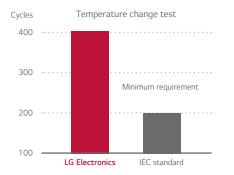

The NeON[™] Cell produces energy from both the front and the back of the cell. This innovative approach allows the absorbtion of light from the back of the cell which raises the panel's efficiency.

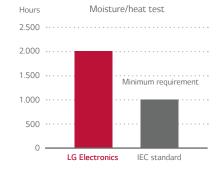

EXCELLENT QUALITY, INDEPENDENTLY TESTED

You can rely on LG. We test our products with double the intensity specified in the IEC standard and in many cases 4 x IEC standards.

Our panels have won a string of International awards.

POWERFUL OUTPUT, GREAT WARRANTY

If you buy an LG panel and should there by a warranty issue you will deal with LG Electronics Australia/NZ. You will not have to worry if the importer is still in operation or wether the manufacturer is located overseas. We are only one phone call away. LG Electronics Australia/NZ backs your product. That's peace of mind. Contact us on solar.sales@lge.com.au or ph 61-2-88054038.

Extended Product Warranty

LG has also extended the product warranty for parts and labour from an industry average 10 years to an impressive 12 years.

LG370N2W-G4 | LG375N2W-G4 **№**2 - 72 Cell

Mechanical Properties

Meenameat roperties	
Cells	6 x 12
Cell Vendor	LG
Cell Type	Monocrystalline / N-type
Cell Dimensions	156.75 x 156.75 mm
# of Busbar	12 (Multi Wire Busbar)
Dimensions (L x W x H)	1960 x 1000 x 46 mm
Front Load	5400 Pa
Rear Load	2400 Pa
Weight	20.3 ± 0.5 kg
Connector Type	Genuine MC4, IP67 (Male: PV-KST4) (Female: PV-KBT4)
Junction Box	IP67 with 3 bypass diodes
Length of Cables	2 x 1200 mm
Front cover	High transmission tempered glass
Frame	Anodised aluminum

Certifications and Warranty

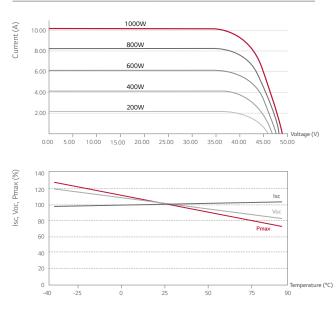

Certifications	ISO 9001	
	IEC 61215, IEC 61730-1/-2	
	62716 (Ammonia Test)	
	IEC 61701(Salt Mist Corrosion Test)	
Module Fire Rating	Class C	
Product Warranty	12 Years	
Output Warranty of Pmax (Measurement Tolerance \pm 3%)	Linear Warranty ¹	

¹ 1) 1st year 98%, 2) After 1st year 0.6% annual degradation, 3) 83.6% at 25 years

Temperature Characteristics

NOCT	45 ± 3 ℃
Pmax	-0.38 %/°C
Voc	-0.28 %/°C
lsc	0.03 %/°C

Characteristic Curves

Electrical Properties (STC²)

Module Type	370 W	375 W
Maximum Power Pmax (W)	370	375
MPP Voltage Vmpp (V)	39.2	39.6
MPP Current Impp (A)	9.44	9.50
Open Circuit Voltage Voc (V)	48.0	48.3
Short Circuit Current lsc (A)	9.98	10.04
Module Efficiency (%)	18.9	19.1
Operating Temperature (°C)	-40 ~ +90	
Maximum System Voltage (V)	1000 (IEC / UL)
